

VIVEK YADAV

Senior Engineering Manager / Senior Principal Engineer | Platform & Distributed Systems

Bengaluru, India | +91 810 523 7870 | vivekyadav.jit@gmail.com

linkedin.com/in/vivek-yadav-09 | github.com/vivek-yadav | vivek-yadav.github.io

SUMMARY

Engineering leader with 12+ years building and scaling cloud-native platforms and the teams behind them. Currently set architecture and engineering standards across 8 product teams (60+ engineers) at Progress Software, and previously, as Senior Engineering Manager, led 12 engineers across 3 squads. Track record of growing high-performing teams, accelerating delivery through internal developer platforms, and driving measurable outcomes in throughput, latency, reliability, and infrastructure cost. Combine hands-on depth in Go, Kubernetes, and distributed systems with people leadership, hiring, mentoring, and cross-functional execution across Product, QE, and Security. Targeting Senior Engineering Manager or Director of Engineering roles.

LEADERSHIP & TECHNICAL SKILLS

Leadership & Management: Engineering Management, People Leadership (teams up to 12), Hiring & Mentoring, Performance & Career Development, Org-wide Engineering Standards, Roadmap & Delivery Planning, Stakeholder Management, Cross-functional Collaboration (Product / QE / Security), Agile / Scrum

Engineering Strategy: Architecture & Design Reviews, Platform Engineering, Distributed Systems, API Design (REST / gRPC), Domain-Driven Design, High Availability / Disaster Recovery, Performance & Cost Optimization

AI & Developer Productivity: Agentic SDLC, Multi-Agent Orchestration, MCP Servers, LLM Integration, Code Generation, Internal Developer Platforms, GitHub Copilot, Anthropic Claude, OpenAI GPT

Technical Foundation: Go (Golang), Python, Java, JavaScript, Kubernetes, Docker, Helm, AWS, PostgreSQL, OpenSearch, NATS JetStream, Kafka, RabbitMQ, Redis, CI / CD, Prometheus, Grafana, OIDC / Keycloak, mTLS, Service Mesh

EXPERIENCE

Progress Software (Chef) — Senior Engineering Manager → Senior Principal Software Engineer Jan 2021 – Present

Senior Engineering Manager (2021–2023, 12 direct reports) → Senior Principal Software Engineer / IC (2024–Present) · Chef-360 & Chef Automate · 8 Teams · 60+ Engineers · Bengaluru

- As Senior Engineering Manager (2021–2023), directly managed 12 engineers across 3 squads, owning feature delivery, on-call rotations, hiring, performance reviews, career growth, and Agile ceremonies.
- Set architecture, design-review, and engineering standards adopted across 8 product teams (60+ engineers) spanning Chef-360 (DSM, Platform Services) and Chef Automate.
- Led an org-wide developer-productivity initiative: built an internal Code-Generation platform producing production-ready Go microservices from OpenAPI specs, cutting new-service bootstrap from ~3 days to under 4 hours (~10x) across 8+ services.
- Introduced an end-to-end Agentic SDLC with human-in-the-loop checkpoints (a multi-agent pipeline on GitHub Copilot with Claude and GPT) to standardize requirements, design, implementation, and security review across teams.
- Built an MCP server for the internal AI Assistant, enabling context-aware querying of Node and Job execution details and AI-driven Job creation and execution; MCP tooling was routed through the existing API Gateway, inheriting user-level authorization enforcement across all actionable operations.
- Owned the engineering performance and scaling roadmap, improving API throughput ~35%, cutting P99 latency ~40%, and reducing infrastructure cost ~20%.

- Partnered with Product, QE, and Security leadership on requirements, release readiness, and compliance across 500+ enterprise deployments.
- Delivered a unified API Gateway and service mesh (OIDC via DexIdP + Keycloak) and scaled Chef Automate HA to manage 60,000+ nodes, including zero-downtime PostgreSQL and OpenSearch major upgrades.
- Contributed to open-source Chef Automate (github.com/chef/automate) — shipped production features, compliance integrations, and platform enhancements consumed by enterprise teams globally.

Grofers India Pvt. Ltd. (now Blinkit) — SDE II & Team Lead

Oct 2018 – Jan 2021

Supply Chain & Platform Engineering · Team of 10 · Bengaluru

- Led a 10-engineer team across Retail Supply Chain, Inventory, and Warehouse Management, delivering ~15% higher order-fulfillment accuracy and ~18% lower inventory shrinkage across 15+ warehouses.
- Established the org-wide Site Reliability Engineering process and RCA investigation framework, improving reliability and incident response across teams.
- Drove observability standardization with "Legend," a Monitoring-as-Code tool in Go adopted by 45+ microservices across 6 teams, cutting setup from ~2 hours to under 10 minutes per service.

Mathologic Technologies — Technical Architect

Feb 2016 – Nov 2017

Operations Research & Optimization · Team of 5

- Led a 5-person team delivering Locomotive and Crew Link Optimization for Indian Railways (13,000+ locomotives, 7,000+ stations, 1M+ crew staff), with estimated INR 100 Cr+ (~\$12M) in projected savings.
- Owned solution architecture, stress testing, and failure-impact analysis end to end, partnering directly with client stakeholders.

Boomerang Commerce — Software Engineer

Jan 2018 – Oct 2018

Product Matching & Keyword Intelligence · Bengaluru

- Improved cross-retailer product-matching accuracy ~22% across 2M+ SKUs on 15+ platforms, and built keyword-harvesting pipelines enriching 1M+ listings.

Infosys — System Engineer

Feb 2014 – Jan 2016

Cross-Platform Communication Infrastructure · Team of 7

- Designed a WebSocket-based multi-device communication system supporting 10,000+ concurrent connections, and built Java, C++, and JavaScript client libraries deployed across 3+ enterprise clients.

EDUCATION

PG Diploma in Advanced Computing — CDAC ACTS, Pune

2013 – 2014

B.E. in Computer Science — RTM Nagpur University

2008 – 2012
