VivekYadav

Principal Software Engineer

Experience

(Total Experience: 11+ Yrs)

(Current Company: Chef Software (under Progress Software))

01/23 - Now **Chef 360** Senior Principal, Architecture Team, Chef Software (Progress Software). Team size: 4

Designed and set standards for teams to adopt. Implemented Code-Gen tool which generate services from API specs, with basic scaffolding based on API specs. Enabling very fast development, and less starting issues. Constant interactions with product on new ideas and customer requirements. Also contribute in new tools and software evaluations for solving business needs. Own the Engineering backlog for performance and scaling improvements.

Technologies: Chef, Golang, PostgreSQL, Kubernetes, Docker, Habitat, RabbitMQ, PGPool, MinIO

Responsibility: Design new systems with performance and scale.

01/21 - 12/23 **Chef Automate** Engineering Manager - Principal Software Engineer, Chef Software (Progress Software). (Team Size: 12)

Working on building API Gateway layer with AuthN/Z for whole Chef Platform products. Also, worked on scaling Chef Automate HA and add important enhancements. Previously, I was helping improve stability of the Open Source project Chef Automate. Worked on adding integration of Data feed to other tools like Splunk, ELK, ServiceNow, S3, etc. Migrated and Upgraded support for DB and other tools and libraries.

Technologies: Chef, Golang, PostgreSQL, OpenSearch, Docker, Habitat, NATS, Buildkite, GoFiber, DexIdP, KeyCloak

Responsibility: Optimize performance and scale with DevSecOps in Agile Process.

10/18 - 01/21 **Retail supply chain, Inventory Management, Warehouse Management SDE2 (Team Lead), Grofers India Pvt. Ltd. (Team Size: 10)**

Worked on making retail supply work smoothly, and reduce cost of operations. Making management of warehouse efficient and cost effective. Enabling operations to be more efficient and accurate. For inventory management find ways to increase availability.

Technologies: Python, Reactjs, Postgres, Postgres, RabbitMQ, Redis, Java, Kafka, MySQL, Kubernetes (K8s), Docker

Responsibility: Finding ways to improve efficiency of retail supply chain. Increase Availability of Items.

10/18 - 01/21 **Monitoring as a Code, "Legend"** SDE2 (Team Lead), Grofers India Pvt. Ltd. (Team Size: 10)

Lead team to develop CICD tool which could take in yaml and generate Grafana dashboards for services, it could be used as CRD along with service k8s yamls.

Technologies: GoLang, grafonnet lib, Grafana, CRD, Kubernetes (K8s), Docker

Responsibility: Implement the tool in golang, use it in CICD as CRD

Personal Skills

Places to work

Bengaluru, India
Gurgaon, India
New Delhi, India

Languages

English ★★★★★
Hindi ★★★★★

Hobbies

Car Trips
Bike Rides
Netflix

01/18 - 10/18 **Matching Same Products, Keyword Harvesting** [SDE,Boomerang Commerce](#)
(Team Size: 4)
Improved Matching algorithm for same products on multiple website. Working on finding Keywords for the products to increase content quality.
Technologies: Java, AWS EC2, AWS ECS, RDS, Snowflake
Responsibility: Finding ways to improve matching accuracy and matching coverage.

02/16 - 11/17 **Locomotive Link Optimization, Crew Link Optimization** [Technical Architect, Mathologic](#) (Team Size: 5)
Developed Optimization system to reduce Locomotive Idle time, with user configurable Slack in Loco Linkage. Station wise Loco Link optimization and overall Loco utilization increased, with potential to impact in saving 100Cr Rs. by Indian Railways. Another project was Crew Link Optimization which also made efficient duty schedule planning for Crew staff of trains across country.
Technologies: (Go Lang, Node Js, REST API, Angular 2, D3js, Mongo DB)
Responsibility: Station wise current slack calculation, Optimized Linkage to reduce Slack one by one to zero slack, Multiple options of optimization for various types of stations and loco sheds, Stress Test linkage for failures, Direct and Indirect Impact analysis based on failures, Full Fresh Linkages of all Locos in Indian Railways for Passenger Trains.

02/14 - 01/16 **Multi-Device Cross platform communication** [System Engineer, Infosys](#) (Team Size: 7)
Designed Communication Channel for connectivity between Native C++ apps to Web Apps. Developed Client Library for Java, C++, Javascript. Individual and Group Broadcast from server side. Member status notification. Types of message include Binary Content (image, video,apps,zip,etc.), Text Message, App Fields, Events.
Technologies: (WebSocket, Java, REST API, C++, Poco Library, JavaScript WebSocket)
Responsibility: Development of Backend Server in Java, Developed Client Library for Java, C++, Javascript, Sample Client App for C++ and Javascript, Messaging protocol, Message Router based on reciever type Group or Individual, Dynamic Group Creation and Removal.

Education

2008 - 2012 **Bachelor of Engineering, Computer Science** [RTM Nagpur University](#)
First Division with 63% Marks

2007 - 2008 **Senior Secondary School (12th Std.), PCM + Computers** [CBSE Board](#)
First Division with 70% Marks

2005 - 2006 **High Secondary School (10th Std.)** [CBSE Board](#)
First Division with 89% Marks

Certification

08/13-02/14 **Computer Diploma in Advance Computing** [CDAC ACTS, Pune](#)
6 Months Post-Graduation Diploma in Advanced Computing, This included all major technologies used in the computer application development industry.

9th May, 2022
