

VIVEK YADAV

Principal Software Engineer · Software Architect (SME) · 12+ Years

Bengaluru, India · +91 810 523 7870 · vivekyadav.jit@gmail.com · github.com/vivek-yadav · vivek-yadav.github.io

PROFESSIONAL SUMMARY

Principal Software Engineer and Architect with 12+ years delivering distributed systems, cloud-native platforms, and developer tooling at enterprise scale. Currently serving as **SME (Architect)** across Chef-360 — **DMS, Platform Services, and Chef Automate** — at Progress Software, setting architecture standards and driving engineering excellence. Deep expertise in **Go, Kubernetes, microservices, API design, and platform engineering**. Track record of leading teams (up to 12 engineers), building code-generation platforms, unified API gateways, and HA distributed systems. Targeting **Staff / Principal Engineer, Engineering Manager, or Solutions Architect** roles.

TECHNICAL SKILLS

Languages	Go (Golang), Python, Java, JavaScript, Shell/Bash, C++
Architecture	Distributed Systems, Microservices, API Design (REST/gRPC), Event-Driven Architecture, Code Generation, Domain-Driven Design
Cloud & Infra	Kubernetes (K8s), Docker, Habitat, AWS (EC2/ECS/RDS), MinIO, Helm, CRDs
Messaging & Data	NATS JetStream, RabbitMQ, Kafka PostgreSQL, PGPool, OpenSearch, MySQL, Redis, MongoDB
Security & IAM	AuthN/AuthZ, API Gateway, DexIDP (OIDC), Keycloak, mTLS
DevOps & Obs.	Buildkite, Jenkins, Grafana, Prometheus, Chef/InSpec, GitOps

PROFESSIONAL EXPERIENCE

SME — Software Architect (Senior Principal Engineer)

Jan 2023 – Present

Chef Software · Progress Software | Chef-360: DMS, Platform Services & Automate · Architecture Team (4) · Bengaluru

- Serve as **SME and Architect** across Chef-360 products — **DMS, Platform Services, and Chef Automate** — owning architectural decisions, design reviews, and engineering standards across squads.
- Designed and shipped an internal **Code-Generation platform** that produces production-ready Go microservices from OpenAPI specs (routing, DB wiring, scaffolding); reduced new service bootstrap from days to hours.
- Owned the **Engineering Performance & Scaling backlog**: drove PostgreSQL/PGPool tuning, RabbitMQ topology optimization, and Kubernetes resource right-sizing — improving system throughput and reliability.
- Partnered with Product Management on roadmap refinement, customer escalations, and evaluation of new technologies (MinIO, messaging backends).

Stack: Go · PostgreSQL · PGPool · Kubernetes · Docker · Habitat · RabbitMQ · MinIO · OpenAPI · Chef

Engineering Manager & Principal Software Engineer

Jan 2021 – Dec 2023

Chef Software · Progress Software | Chef Automate · Team of 12 · Bengaluru

- Architected unified API Gateway** with AuthN/Z (OIDC via DexIDP + Keycloak) across the Chef Platform — enforcing consistent identity and access control for all products.
- Scaled **Chef Automate HA**: hardened database failover, improved query performance, and expanded horizontal scalability for enterprise deployments.
- Built **Data Feed integrations** with Splunk, ELK Stack, ServiceNow, and Amazon S3, enabling compliance teams to route audit data to their preferred tooling.
- Led PostgreSQL and OpenSearch major upgrade cycles for the open-source Chef Automate project without breaking changes.
- Managed 12 engineers — feature delivery, on-call rotations, career growth, Agile ceremonies, and cross-functional PM/QE collaboration.

Stack: Go · GoFiber · PostgreSQL · OpenSearch · NATS · Docker · Habitat · Buildkite · DexIDP · Keycloak

SDE II & Team Lead — Supply Chain & Platform Engineering

Oct 2018 – Jan 2021

Grofers India Pvt. Ltd. (now Blinkit) · Team of 10 · Gurugram

- Led engineering for **Retail Supply Chain, Inventory Management, and Warehouse Management** — improved fulfillment accuracy, reduced operational waste, and increased item availability across dark stores.
- Designed and built **"Legend"** — a Monitoring-as-Code CICD tool (Go) that consumed YAML and auto-generated Grafana dashboards deployed as Kubernetes CRDs alongside service manifests, standardizing observability org-wide.

Stack: Go · Python · Java · React.js · PostgreSQL · MySQL · Kafka · RabbitMQ · Redis · Kubernetes · Docker

SDE — Product Matching & Keyword Intelligence

Jan 2018 – Oct 2018

Boomerang Commerce · Team of 4 · Bengaluru

- Improved cross-retailer **product matching algorithms** — increased accuracy and coverage of same-product identification across e-commerce platforms.
- Built **keyword harvesting pipelines** to enrich product content quality and improve search relevance.

Stack: Java · AWS EC2 · AWS ECS · RDS · Snowflake

Technical Architect — Operations Research & Optimization

Feb 2016 – Nov 2017

Mathologic Technologies · Team of 5

- Built **Locomotive Link Optimization** for Indian Railways — reduced idle time with configurable slack, station-wise linkage optimization, stress testing, and failure impact analysis. Estimated impact: **₹100 Cr+ savings**.
- Delivered **Crew Link Optimization** for efficient nationwide duty scheduling of train crew staff.

Stack: Go · Node.js · Angular 2 · D3.js · MongoDB · REST API

System Engineer — Cross-Platform Communication Infrastructure

Feb 2014 – Jan 2016

Infosys · Team of 7

- Designed a **multi-device cross-platform communication system** bridging native C++ apps with web clients over WebSocket — supporting individual/group messaging, binary content, and member status notifications.
- Developed client libraries for **Java, C++, and JavaScript**; built message router with dynamic group creation/removal and protocol-level message typing.

Stack: Java · C++ · WebSocket · JavaScript · REST API · Poco Library

EDUCATION & ADDITIONAL

PG Diploma in Advanced Computing

CDAC ACTS, Pune

Aug 2013 – Feb 2014

B.E. — Computer Science

RTM Nagpur University

2008 – 2012 · First Division (63%)

Open to: Bengaluru · Gurugram / NCR · Remote

Languages: English (Professional) · Hindi (Native)
